COVID-19 SLIDE DECK.
This document contains a series of PDF slides for open-access use by anyone wanting to present on COVID-19 surveillance trends in the Caribbean. We start with regional overviews, and follow these overviews with country-by-country updates. 20 Caribbean countries and territories are included. The data presented are correct as of 4 Aug 2020.

All slides created by Ian Hambleton, Professor of Biostatistics, George Alleyne Chronic Disease Research Centre. Email ian.hambleton@cavehill.uwi.edu with any questions related to these slides. All graphics are drawn from our COVID-19 briefings, updated daily and available at: www.uwi.edu/covid19/surveillance
REGIONAL COVID-19 DAILY CASES

## Outbreak growth compared with international locations

The graph compares the cumulative number of cases in Anguilla with other international locations. The x-axis represents days since the first case, and the y-axis represents the cumulative number of cases. The graph shows that Anguilla has had a low number of cases compared to countries like New Zealand, Iceland, Singapore, and the United Kingdom.
COVID-19 SUMMARY for Antigua and Barbuda
